

Velocity

Sejalan dengan meningkatnya mobilitas pelanggan yang menggunakan Velocity dalam mengelola dana, Bank juga menyadari bahwa sistem perbankan menjadi lebih terekspos karena pelanggan dapat mengakses data dan informasi atau melakukan transaksi perbankan secara *online* dan *real time*. Merespon hal tersebut, maka tata kelola perusahaan perlu diperkuat agar lebih terlindungi dan tahan terhadap ancaman, seperti misalnya penipuan internal dan eksternal, serta dinamika industri.

In line with the increase in customer mobility due to the use of Velocity in managing funds, Bank realizes that the banking system has become more exposed as it enables customers to access data and information, or make banking transactions, online or real time. In response, corporate governance must be strengthened to make it safer and resistant to threats, such as internal and external fraud, as well as the industry dynamics.
